

LASER CUTTING

IMPROVE YOUR PRODUCTIVITY

Since 1982, Tinsley Design has been supplying our customers with a wide array of fabricated metal parts and assemblies. Housed on a modern 3-acre site, you will find state-of-the-art production machinery, the latest in CAD design systems, and an experienced staff who understands both cost concerns and the need to meet critical deadlines.

TINSLEY DESIGN NOW OFFERS LASER CUTTING

Innovative Top Technology with the Highest Productivity

- Laser cutting on a 3000 watt Bystronic Laser System
- High precision of dimensions
- Minimum heat distortion of sheet parts
- Cuts aluminum, mild or stainless steel
- Up to 3/4" thick plate
- Automatic sheet handling up to 5' x 10'
- From design to finished parts... or from your prints

Our Bystronic Laser is easily programmed to cut precision parts for all your manufacturing needs!

Tinsley Design guarantees the best prices and the quickest turnaround. Call now for information 570.842.7614
